Hydrophilic Prelude SNAP™

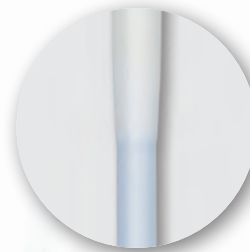

Splittable Sheath Introducer

Now with
Hydrophilic
Coating

Requires
50%
less insertion
force

Easier to Break
requiring 66% less
break force than
its predecessor

Seamless
sheath-to-dilator
transition with
hydrophilic coating

Hydrophilic Prelude SNAP™

Splittable Sheath Introducer

The Hydrophilic Prelude SNAP features a **HYDROPHILIC** sheath coating that reduces insertion force by 50%*. A smooth sheath to dilator transition can help reduce vessel trauma and improve smooth navigation through torturous anatomy. The Hydrophilic Prelude SNAP contains the same **HIGH QUALITY** hub which requires 66% less break force than its predecessor making it **EFFORTLESS** to remove and helping ensure leads stay in place.

PRODUCT FEATURES

Robust Valve Design

Tight seal to protect against air embolism and blood loss.

Improved Grip

Expanded wings with non-slip, ridged surfaces facilitate a tighter, more assured grip.

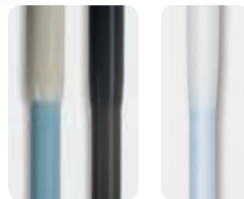

Easier to Break

Requires 66% less break force than its predecessor.*

Seamless Transition

Smoother sheath-to-dilator transition to reduce vessel trauma and promote ease of insertion.

Competitors' sheath-to-dilator transitions

Our seamless sheath-to-dilator transition

Hydrophilic Coating

Covers 75% of distal sheath length for ease of insertion while maintaining stability.

KIT CONTENTS

- Splittable Sheath
- Dilator
- Guide Wire 0.038" x 50 cm or 0.038" x 80 cm
- 18G Needle
- 12 mL Syringe
